

Journal Spreadsheet Upload

If an attempt to upload a journal spreadsheet fails, the problem may be Microsoft Security Update KB973593 for Excel. This document gives you two solutions to the problem.

Solution 1

This is a temporary fix that you will need to perform any time you want to perform a spreadsheet upload.

When a journal spreadsheet upload fails, the following screen is displayed.

Procedure

When the General Options invalid box displays, perform the following steps:

1. Minimize the spreadsheet.
2. Restore the spreadsheet.

The invalid box is no longer displayed.

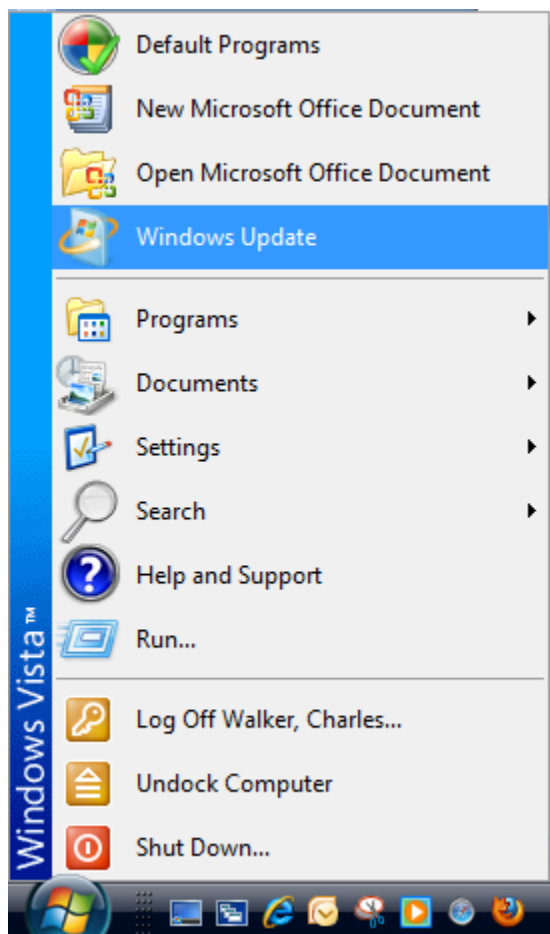

Solution 2

This is a permanent fix that requires you to uninstall the Microsoft update.

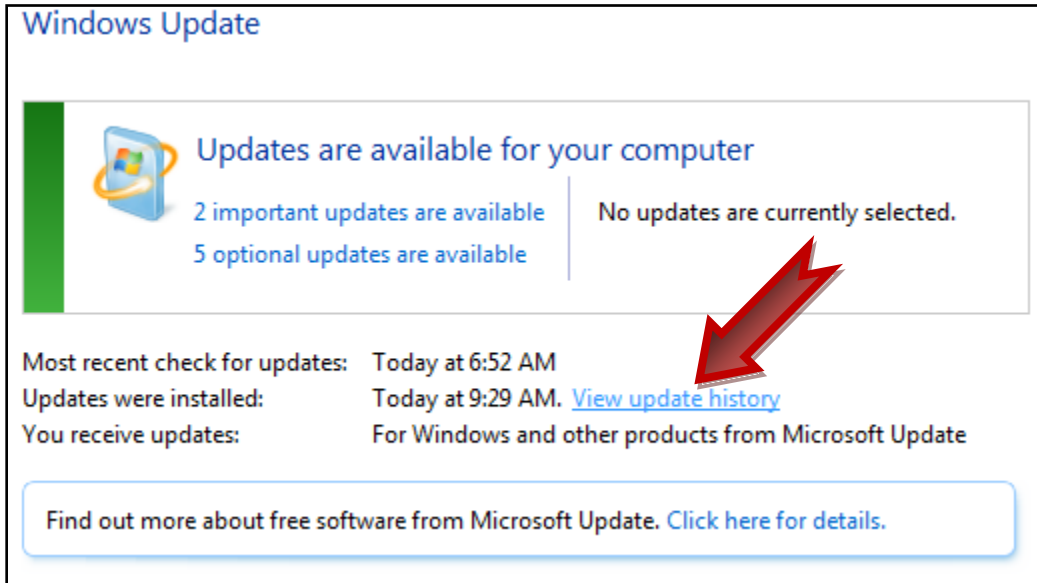

Procedure

To uninstall Microsoft Security Update KB973593, perform the following steps:

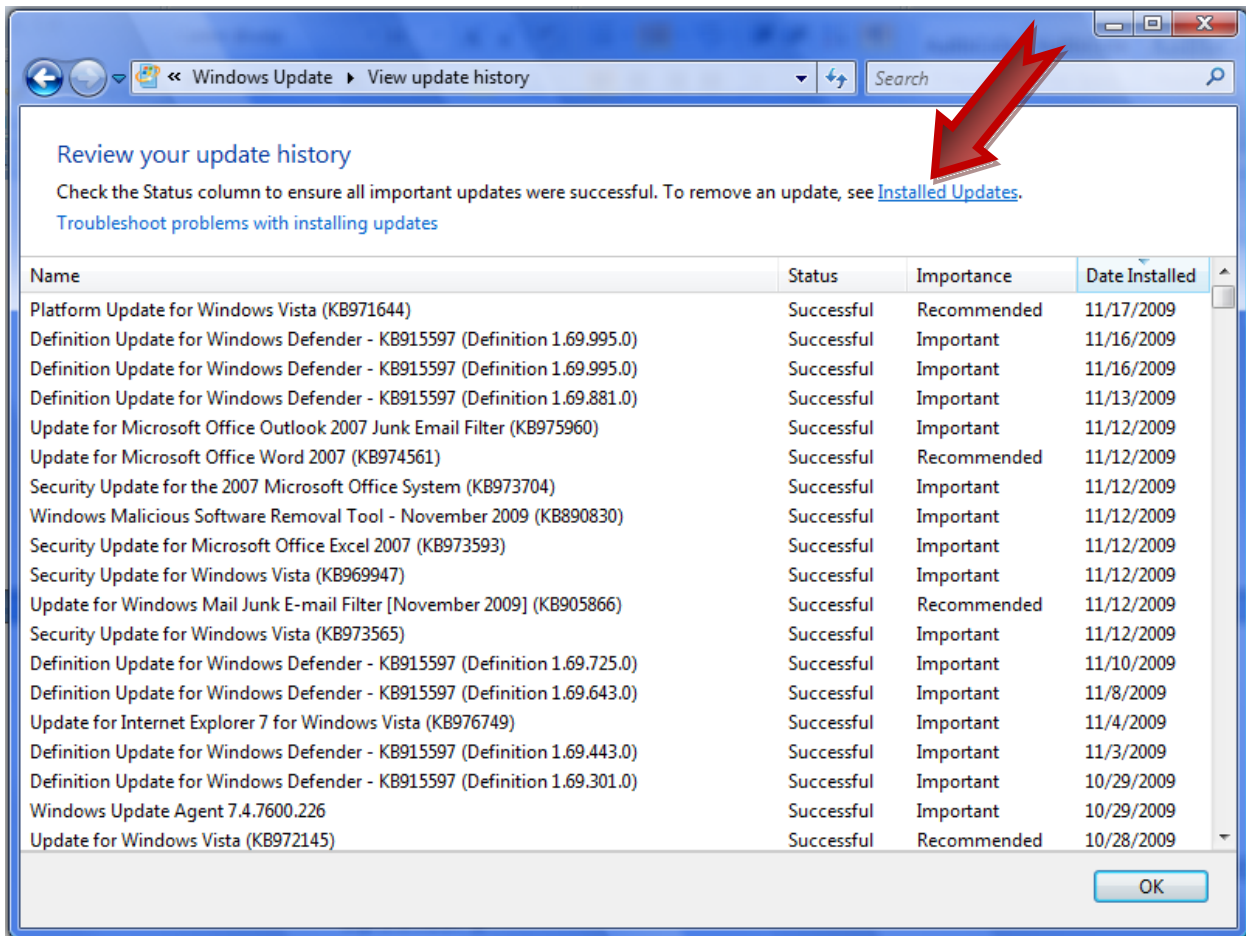

1. On the Start menu, select Windows Update.

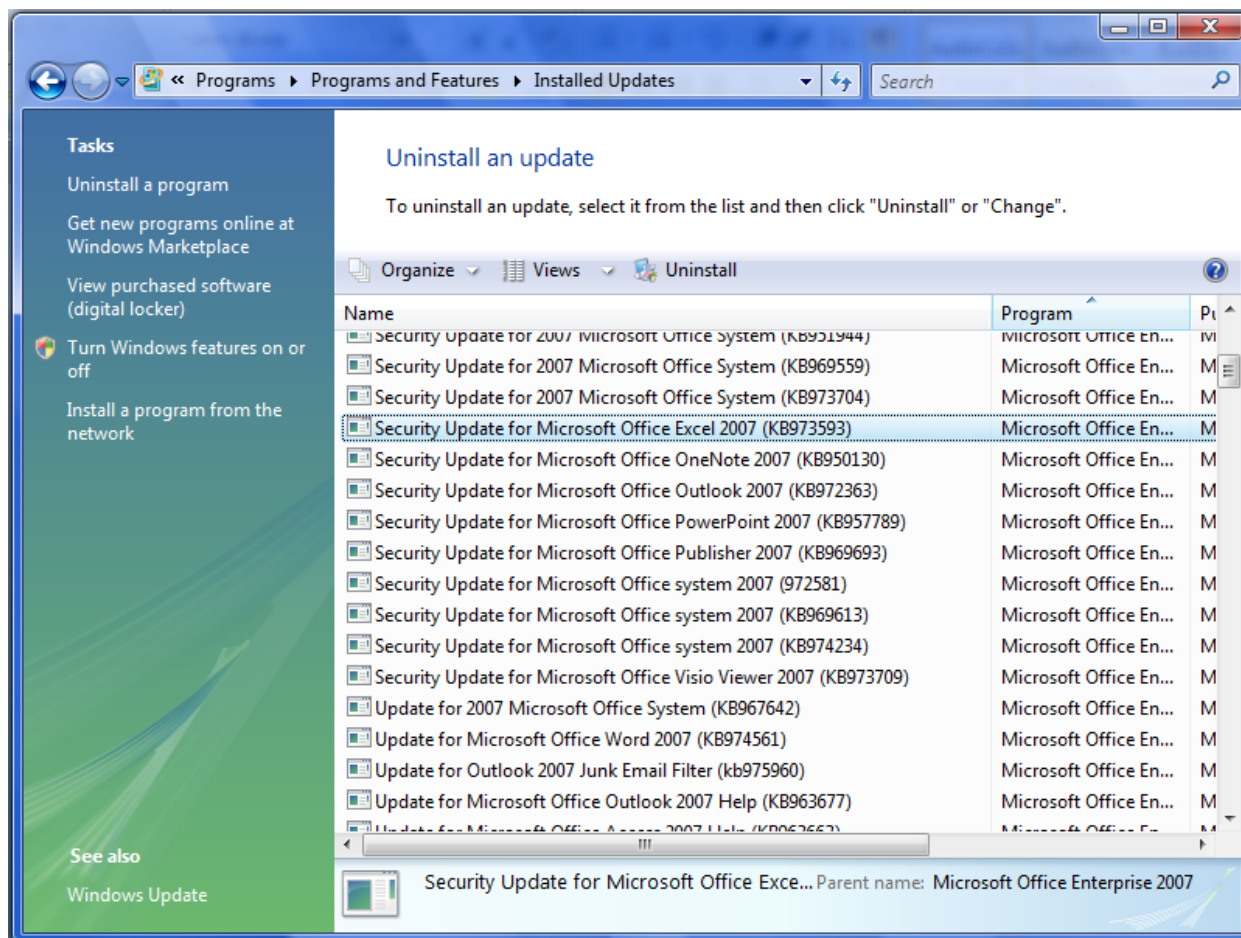

- On the Windows Update screen, click **View update history**.

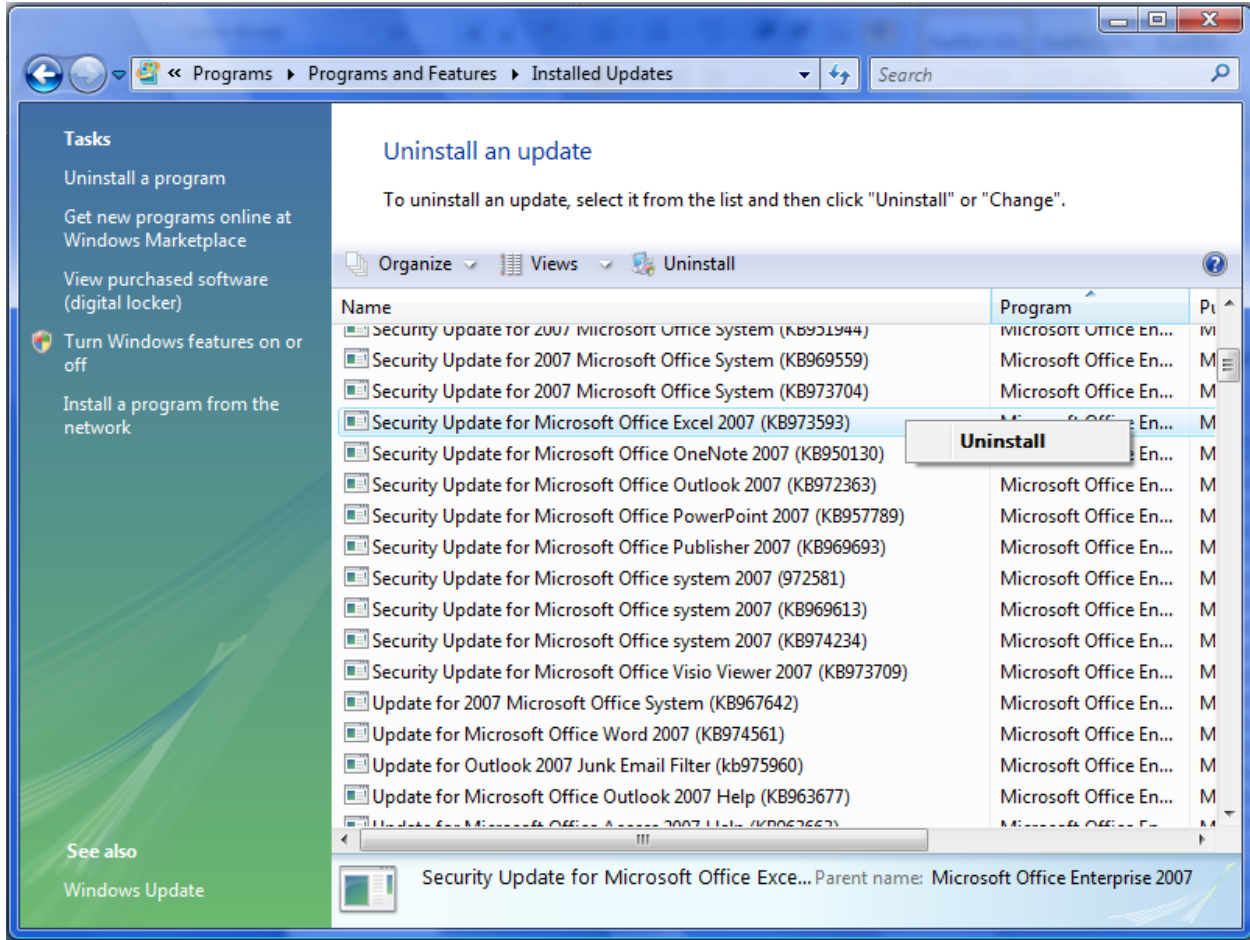

- When the **Review your update history** screen displays, click **Installed Updates**.

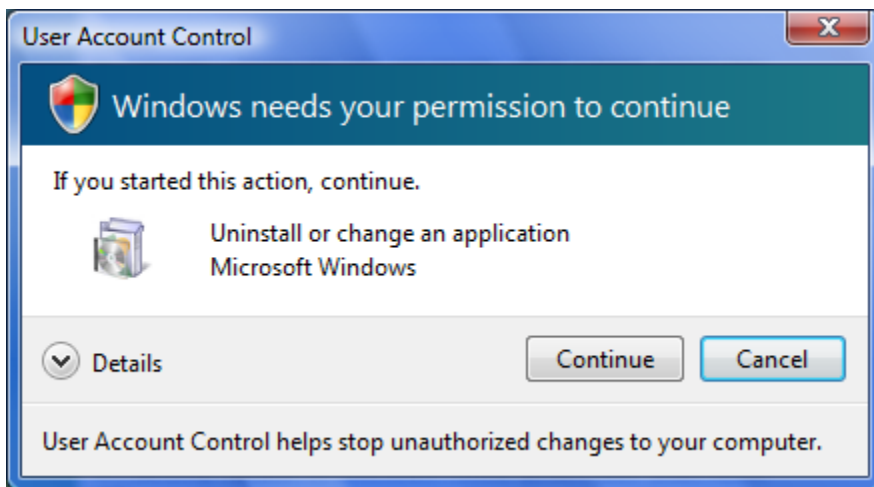

4. Select **Security Update for Microsoft Office Excel 2007 (KB973593)** from the list of installed updates.

5. Right click on the selected update. Click **Uninstall**.

6. Click **Continue**. The update will be uninstalled.

7. To complete the uninstall, close Excel.
